Organizational Maintenance Repair Parts and Special Tools List

FOR

SHELTER SYSTEM, COLLECTIVE PROTECTION, CHEMICAL-BIOLOGICAL: INFLATABLE TRAILER-TRANSPORTED, M51

(NSN 4240-00-854-4144)

TM 3-4240-264-20P, 31 October 1975, is changed as follows:

1. This change is required for replacement of the aluminum fuel tank with a steel tank.
2. New or changed material in Section II is indicated by an action change code as specified in paragraph 4d, Section I.
3. Remove old pages and insert new pages as indicated below.

Remove Pages	*Insert Pages*
i through iii	i through iii
1-3	1-3
2-23 through 2-26.1	2-23 through 2-26.2
2-29 through 2-32	2-29 through 2-32
2-65 through 2-68.1	2-65 through 2-68.2
2-77 and 2-78	2-77 and 2-78
4-1 through 4-10	4-1 through 4-10

4. File this change sheet in front of the publication for reference purposes.

By Order of the Secretary of the Army:

E. C. MEYER
General, United States Army
Chief of Staff

Official:

ROBERT M. JOYCE
Brigadier General, United States Army
The Adjutant General

Distribution:

To be distributed in accordance with DA Form 12-28, Organizational maintenance requirements for Field and Shelters.

REPORTING ERRORS AND RECOMMENDING IMPROVEMENTS

You can help improve this manual. If you find any mistakes or if you know of a way to improve the procedures, please let us know. Mail your letter, DA Form 2028 (Recommended Changes to Publications and Blank Forms), or DA Form 2028-2 located in the back of this manual direct to: Commander, US Army Armament Materiel Readiness Command, ATTN: DRSAR-MAS-C, Aberdeen Proving Ground, MD 21010.

A reply will be furnished to you.

ORGANIZATIONAL MAINTENANCE

REPAIR PARTS AND SPECIAL TOOLS LIST

Section I. INTRODUCTION

1. Scope

This manual lists repair parts, special tools, and other support equipment required for operation and performance of organizational maintenance of the M51 Shelter System.

2. General

This Repair Parts and Special Tools List is divided into the following sections:

a. Section II—Repair Parts List. A list of repair parts authorized for use in the performance of maintenance. The list also includes parts which must be removed for replacement of the authorized parts. Parts list are composed of functional groups and subgroups in ascending numerical sequence, with the parts in each group or subgroup listed in figure and item number sequence. Bulk materials are listed in NSN sequence.

b. Section III—Special Tools List. Not Applicable.

c. Section IV—National Stock Number and Part Number Index. A list, in ascending numerical sequence, of all National stock numbers appearing in the listings, followed by a list, in alphameric sequence, of all part numbers appearing in the listings. National stock numbers and part numbers are cross-referenced to each illustration figure and item number appearance.

3. Explanation of Columns

The following provides an explanation of columns found in the tabular listings:

a. Illustration. This column is divided as follows:

(1) *Figure Number.* Indicates the figure number of the illustration in which the item is shown.

(2) *Item Number.* The number used to identify each item called out in the illustration.

b. Source, Maintenance, and Recoverability Codes (SMR).

(1) *Source Code.* Source codes are assigned to support items to indicate the manner of acquiring support items for maintenance, repair, or overhaul of end items. Source codes are entered in the first and second positions of the Uniform SMR Code format as follows:

Code	*Definition*
PA	Item procured and stocked for anticipated or known usage.
PB	Item procured and stocked for insurance purposes because essentiality dictates that a minimum quantity be available in the supply systems.
PC	Item procured and stocked and which otherwise would be coded PA except that it is deteriorative in nature.
MO	Item to be manufactured or fabricated at organizational level.
AO	Item to be assembled at organizational level.
AF	Item to be assembled at direct support maintenance level.
XA	Item is not procured or stocked because the requirements for the item will result in the replacement of the next higher assembly.
XB	Item is not procured or stocked. If not available through salvage, requisition.

NOTE

Cannibalization or salvage may be used as a source of supply for any items source coded above except those coded XA.

(2) *Maintenance Code.* Maintenance codes are assigned to indicate the levels of maintenance authorized to USE and REPAIR support items. The maintenance codes are entered in the third and fourth positions of the Uniform SMR Code format as follows:

(a) The maintenance code entered in the third position will indicate the lowest maintenance level authorized to remove, replace, and use the support item. The maintenance code entered in the third position will indicate one of the following levels of maintenance:

Code	*Application/Explanation*
C	Crew or operator maintenance performed within organizational maintenance.
O	Support item is removed, replaced, used at the organizational level.

(b) The maintenance code entered in the fourth position indicates whether the item is to be repaired and identifies the lowest maintenance level with the capability to perform complete repair (i.e., all authorized maintenance functions). This position will contain one of the following maintenance codes:

Code	*Application/Explanation*
O	The lowest maintenance level capable of complete repair of the support item is the organizational level.

Code	*Application/Explanation*
F	The lowest maintenance level capable of complete repair of the support item is the direct support level.
Z	Nonreparable. No repair is authorized.

(3) *Recoverability Code.* Recoverability codes are assigned to support items to indicate the disposition action on unserviceable items. The recoverability code is entered in the fifth position of the Uniform SMR Code format as follows:

Recoverability Code	*Definition*
Z	Nonreparable item. When unserviceable, condemn and dispose at the level indicated in position 3.
O	Reparable item. When uneconomically reparable, condemn and dispose at organizational level.
F	Reparable item. When uneconomically reparable, condemn and dispose at the direct support level.
A	Item requires special handling or condemnation procedures because of specific reasons (i.e., precious metal content, high dollar value, critical material or hazardous material). Refer to appropriate manuals/directives for specific instructions.

c. National Stock Number. Indicates the National stock number assigned to the item and will be used for requisitioning purposes.

d. Part Number. Indicates the primary number used by the manufacturer (individual, company, firm, corporation, or Government activity), which controls the design and characteristics of the item by means of its engineering drawings, specifications standards, and inspection requirements, to identify an item or range of items.

NOTE

When a stock numbered item is requisitioned, the repair part received may have a different part number than the part being replaced.

e. Federal Supply Code for Manufacturer (FSCM). The FSCM is a 5-digit numeric code listed in SB 708-42 which is used to identify the manufacturer, distributor, or Government agency, etc.

f. Description. Indicates the Federal item name and, if required, a minimum description to identify the item. Items that are included in kits and sets are listed below the name of the kit or set with the quantity of each item in the kit or set indicated in the quantity incorporated in unit column.

g. Unit of Measure (U/M). Indicates the standard of the basic quantity of the listed item as used in performing the actual maintenance function. This measure is expressed by a two-character alphabetical abbreviation (e.g., ea, in, pr, etc). When the unit of measure differs from the unit of issue, the lowest unit of issue that will satisfy the required units of measure will be requisitioned.

h. Quantity Incorporated in Unit. Indicates the quantity of the item used in the breakout shown on the illustration figure, which is prepared for a functional group, subfunctional group, or an assembly.

4. Special Information

a. Detailed manufacturing instructions for items source coded to be manufactured or fabricated are found in TM 3-4240-264-12. Bulk materials required to manufacture items are listed in the Bulk Material Group of this manual.

b. Detailed assembly instructions for items source coded to be assembled are found TM 3-4240-264-12. Assembly components are listed immediately following the item to be assembled.

c. The repair kit is listed near the end of the repair parts listing (subgroup 0427).

d. Action change codes indicated in the left-hand margin of the listing page denote the following:

N—Indicates an added item.
C—Indicates a change in data.
R—Indicates a chang ein NSN only.

e. The following publications pertain to the M51 Shelter System and its components:

Publication and Short Title	
TM 3-4240-264-12	Shelter System, M51
TM 3-4230-204-13	Decontaminating Apparatus, Portable, ABC-M11
LO 5-2805-259-12	Engine, Gasoline, 20hp, Mil Std Models (Model 4A084-2 and Model 4A084-3)
TM 5-2805-259-14	Engine, Gasoline, 20 hp, Mil Std Models (Model 4A084-2 and Model 4A084-3)
TM 5-2805-259-24P	Engine, Gasoline, 20hp, Mil Std Models (Model 4A084-2 and Model 4A084-3)
TM 9-2330-213-14	Chassis, Trailer: 1½ Ton, 2-Wheel, M103 Series; Trailer Cargo: 1½ Ton, 2-Wheel, M104 and M105 Series; Trailer, Tank, Water: 1½ Ton, 2-Wheel, M106 and M107 Series; Trailer, Van, Shop, 1½ Ton, 2-Wheel: M448

f. The illustrations, functional groups, and subgroups in this manual are identical to those published in the -34P manual. Only these parts assigned the third position SMR maintenance code "C" or "O" are listed in the tabular listing;

therefore, there may be a break in the item number, functional group or subgroup sequence. Only illustrations containing organizational authorized items appear in this manual.

5. How to Locate Repair Parts

a. When National Stock Number or Part Number is Unknown:

(1) *First.* Using the table of contents, determine the functional group or subgroup within which the repair part belongs. This is necessary since illustrations are prepared for functional groups and subgroups, and listings are divided into the same groups.

(2) *Second.* Find the illustration covering the functional group or subgroup to which the repair part belongs.

(3) *Third.* Identify the repair part on the illustration and note the illustration figure and item number of the repair part.

(4) *Fourth.* Using the Repair Parts Listing, find the figure and item number noted on the illustration.

b. When National Stock Number or Part Number is Known:

(1) *First.* Using the Index of National Stock Numbers and Part Numbers, find the pertinent National stock number or part number. This index is in ascending NSN sequence followed by a list of part numbers in ascending alphameric sequence, cross-referenced to the illustration figure number and item number.

(2) *Second.* After finding the figure and item number, locate the figure and item number in the repair parts list.

6. Abbreviations

Abbreviations	*Explanation*
AMP	Ampere
AWG	American wire gage
C-B	Chemical-Biological
ECU	Evacuation control unit
EXT	External
GP	Gas-particulate
INT	Internal
MFD	Manufactured
MOD	Modified
MTG	Mounting
NOM	Nominal
NPTF	National pipe thread female
NPTM	National pipe thread male
PG	Package
PSI	Pounds per suqare inch
RO	Roll
SH	Sheet
SL	Spool
SX	Stick
THD	Thread
THK	Thick
TU	Tube
W	Width
